PROFESSIONAL SUMMARY

Computer Science and Engineering student graduating in 2027 with hands-on project experience in backend development, REST APIs, SQL databases, data validation, and AWS deployment. Familiar with troubleshooting application/data issues, Linux, PowerShell, Power BI, Python, and cloud fundamentals. Interested in enterprise application support, data integrity, workflow automation, and digital solutions.

EDUCATION

GLA University, Mathura, Uttar Pradesh
B.Tech in Computer Science and Engineering | Aug 2023 – May 2027

EXPERIENCE

AWS Solution Architect Trainee (JOVAC Program) | Technical Guftgu | Remote
June 2025 – July 2025

- Completed structured AWS Solution Architect training covering core cloud services, infrastructure design, and deployment fundamentals.
- Practiced launching and configuring EC2 instances and deploying applications in a Linux environment; reviewed instance images and access setup.
- Worked with S3 storage, IAM users/roles/policies, and VPC networking concepts, including access control and basic cloud-security practices.

PROJECTS

Data Consistency Checker ↗

Node.js, Express.js, MongoDB, JavaScript, AWS

- Built a Node.js/Express application to scan MongoDB collections for missing fields, incorrect data types, and invalid values using configurable validation rules.
- Exposed REST endpoints for consistency checks, report generation, status tracking, and historical results; organized the backend into reusable checking and reporting components.
- Created a dashboard to review check status and reports, with support for scheduled checks and tracking consistency issues over time.

FinTech Transaction & Reconciliation System ↗

Java, MySQL, Spring Security

- Building Java backend APIs for simulated financial transactions, account management, and transaction-status tracking with a layered application structure.
- Modeling accounts, transactions, and ledger entries in MySQL; using Spring Security and database transactions as part of the backend design.
- Developing reconciliation checks for duplicate transactions, missing ledger entries, and amount mismatches to help identify inconsistencies in simulated payment records.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), SQL
Frameworks & APIs: Node.js, Express.js, React.js, REST APIs
Databases: MySQL, MongoDB
Tools & Systems: AWS (EC2, S3, IAM, VPC), Linux, PowerShell, Power BI, Git, GitHub, Postman
Core Concepts: DSA, OOP, DBMS, Operating Systems, Computer Networks, data validation

CERTIFICATIONS

- AWS Solution Architect Training – JOVAC Program, Technical Guftgu
- API Beginner Learning Path – Postman Academy
- Introduction to SQL – DataCamp
- Trust and Security with Google Cloud – Google Cloud

ACHIEVEMENTS

- Silver Elite (Top 5%) in NPTEL Leadership Quality, conducted by IIT Roorkee.
- Earned a 5-Star Badge in Python on HackerRank.
- Solved 300+ coding problems across LeetCode and HackerRank.
